ONTARIO HOSPITAL SERVICES COMMISSION

Annual Report 1964

Statistical Supplement

Digitized by the Internet Archive
in 2023 with funding from
University of Toronto

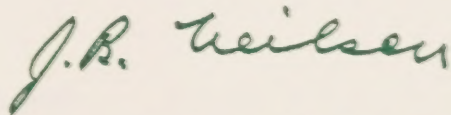

<https://archive.org/details/31761116496209>

FOREWORD

The Annual Report of the Ontario Hospital Services Commission for 1964 is issued in two parts. The first part is a general summary of the significant factors and trends in the general experience of the hospitals and the Plan, while the second is a statistical supplement which provides detailed information about each hospital approved under the Plan.

The information found in the Statistical Supplement is derived principally from the information supplied by the hospitals on their Annual Returns, as required under the terms of the Federal-Provincial Agreement. Reference to the text is important, as it clarifies factors that are not immediately apparent from a cursory view of the data.

I would like to pay tribute to hospitals and to the staff of the Commission, particularly the Research and Statistics Division, for the co-operative effort in producing this Annual Report.

A handwritten signature in dark ink, reading "J. B. Neilson". The signature is written in a cursive style with a large, sweeping "J" and a long, horizontal stroke for the "Neilson" part.

J. B. NEILSON, M.B.E., M.D.,
Chairman.

HOSPITAL HIGHLIGHTS—1964

A. FACILITIES AND SERVICES

The purpose of the Statistical Supplement to the 1964 Annual Report is to present particulars about the use made of hospital services and the associated costs of those hospitals and nursing homes operating under the jurisdiction of the Ontario Hospital Services Commission.

The small tables (A to K) that are interspersed in the next few pages afford a comparison of the volume of patients treated and their lengths of stay, the utilization being made of hospital beds and services, and the prevailing trends in hospital staffing. Table L summarizes the total financial responsibility of the Commission with respect to services provided in all hospitals and nursing homes approved under the Plan.

With the exception of the information on morbidity (Tables 15–17), all statistical and financial data in this Supplement were derived from the edited and certified Annual Returns received from hospitals and related facilities. The morbidity data were accumulated from hospital admission-discharge forms processed and tabulated in 1964.

The format of Tables 1–23 in the 1964 Supplement, however, differs substantially from those produced in earlier years. It was decided in order to facilitate the making of comparisons, to organize the tables under six main headings:

Public Hospitals (active, convalescent and chronic hospitals and units).....	Tables 1–10
Private Hospitals.....	Tables 11, 12
Federal Hospitals.....	Table 13
Nursing Homes Temporarily Approved for Chronic Care.....	Table 14
Morbidity Data.....	Tables 15–17
Financial Data Pertaining to Public Hospitals.....	Tables 18–23

All tables relating to public hospitals (Tables 1–10, 18–23) were grouped first as follows, and then within each of these groups by descending order of bed size.

1. All group A (general) hospitals, except those listed in group 2 below, which were shown separately because of their specialized nature.
2. Hospital for Sick Children and The Princess Margaret Hospital, both in Toronto.
3. Groups B and C (general) hospitals.
4. Group D (Red Cross Outpost) hospitals.
5. Group E (convalescent) hospitals.
6. Groups F and G (chronic) hospitals.

This arrangement, particularly where general hospitals were concerned, permitted the consolidation of all information relating to a particular item of interest into one table. It should be noted that in addition to totals for particular bed-size classifications the following summaries according to level of care have also been provided:

- (1) Group A hospitals less Hospital for Sick Children and The Princess Margaret Hospital.
- (2) All Group A hospitals combined, grand total only.
- (3) Groups B and C hospitals, 100 beds and over.
- (4) Groups B and C hospitals, under 100 beds.
- (5) Groups B and C hospitals all sizes combined.
- (6) Groups A, B and C hospitals combined.
- (7) Group D hospitals.
- (8) Groups A to D hospitals combined, grand total only.
- (9) Group E hospitals.
- (10) Groups F and G, individually and combined.
- (11) Groups A to G combined, grand total only.

The Statistical Supplement also differs from previous years in that two new tables have been added; namely,

Table 9: Departmental Distribution of Paid Hours of Work on a Per Diem Basis.

Table 20: Departmental Distribution of Gross Operating Costs on a Per Diem Basis.

In addition, Table 21, (Departmental Distribution of Allowable Salaries and Wages on a Per Diem Basis), which shows the departmental distribution of salaries and wages in public hospitals was amended. When making comparisons between Tables 9, 20 and 21 it should be borne in mind that the per diem rates calculated for Table 9 were based on total adult and child days plus one quarter of newborn days, while the calculations in Tables 20 and 21 were based on total adult and child days only. Total days in both cases would include days of care in convalescent and/or chronic units attached to public general hospitals.

To facilitate finding data about specific public hospitals, an alphabetical index has been inserted at the end of this Supplement. A similar index to private hospitals, temporarily approved nursing homes and federal hospitals has been omitted, since these facilities are still listed alphabetically as in previous years.

This Supplement does not contain any particulars about tuberculosis sanatoria, Ontario Hospitals for the mentally-ill, private hospitals for the mentally-ill or retarded, or those units in federal hospitals providing domiciliary and long-term mental care.

1. Hospital Accommodation in Ontario

The construction of new hospital facilities and the renovation of older hospital areas continued, but at a somewhat slower pace than in 1963. The total beds available at the end of 1964 was 44,594, representing a net increase of 1,461 or 3.4 per cent over 1963. Relatively, the growth in the number of convalescent beds was largest, although this group formed only 3.0 per cent of the total beds in service.

TABLE A

Type of Bed	Total Rated Bed Capacity	% Increase or (Decrease) in Beds	Number per 1,000 Eligible Population ¹			
			1961	1962	1963	1964
Public and Private Hospitals ²						
Active Treatment.....	33,083	4.2	4.7	4.9	5.0	5.0
Psychiatric (short-term and intermediate).....	642	6.1	.1	.1	.1	.1
Convalescent Care including Rehabilitation.....	1,343	15.4	.1	.1	.2	.2
Chronic Care.....	6,956	.1	1.1	1.0	1.0	1.1
All levels of care.....	42,024	3.9	6.0	6.1	6.3	6.4
Federal Hospitals and Nursing Stations						
All levels of care.....	2,570	(3.7)	.4	.4	.4	.4
Total, all levels of care.....	44,594	3.4	6.4	6.5	6.7	6.8

The net increase of 1,197 active treatment beds in public general hospitals resulted from additional wings being built on several existing hospitals, plus the construction of replacement or new hospitals. Public hospitals were replaced at Ajax, Alliston, Port Hope, and Toronto (Orthopaedic and Arthritic), and a new one, The West Haldimand General, established at Hagersville. Footnote number 19 to Table 1 on page 10 lists those hospitals that completed building or renovation programmes involving 10 beds or more in 1964.

¹Eligible population is defined to be the total provincial population (6,586,000) less armed forces personnel, members of the R.C.M.P. and inmates of Federal institutions (45,000). These figures are not comparable with those quoted in previous Statistical Supplements, since they were based on total population.

²Includes temporarily approved nursing homes.

There were 748 psychiatric beds in units of public general hospitals as at December 31, 1964, compared with 549 beds at the same date two years ago. Because it is thought that many psychiatric patients requiring short-term or intermediate treatment could be best looked after in a general hospital setting, the establishment of these units is being carefully co-ordinated with a programme to reduce the active treatment load currently being handled by the Ontario (public mental) Hospitals.

The 15.4 per cent increase in public convalescent beds was the result of establishment of units at Chedoke General and Children's Hospital, Hamilton, St. Vincent Hospital, Ottawa, The Freeport Sanatorium, Kitchener, and The Queen Elizabeth Hospital, Toronto.

Six new units for the care of the chronically-ill were completed, bringing 232 new beds into use. The reduction in the rated capacity of Riverview Hospital in Windsor by 91 beds and the re-classification of 93 existing beds for the chronically-ill to convalescent care reduced the net gain in chronic care beds to 48.

There was very little change in the amount of bed accommodation provided by private hospitals, federal hospitals and nursing homes. Three private hospitals ceased operation in 1964 reducing the number of beds by 14. The footnotes to Table 11 provide detailed information concerning these institutions. Twenty beds in two nursing homes also received temporary approval for chronically-ill patients. Little change was reported by federal hospitals in the number of beds available for insured patients. During the year Sunnybrook Hospital leased 43 beds to Wellesley Hospital for the treatment of rheumatic and arthritic patients, until the latter hospital's construction programme was completed.

The bed ratios in Table A have been based on eligible population. Since "federal" beds are not included in the Commission's planning formulae¹, it will be seen that the number of available beds are within Commission planning standards.

Volume of Hospital Care

As will be seen in Tables B, C, D and E, the utilization of all hospitals and nursing homes continued to show increases in most areas in keeping with past trends.

TABLE B

Part I

	<i>Patients Under Care</i>				<i>Days of Care</i>			
	<i>Total for 1964</i>	<i>% Increase or (Decrease)</i>			<i>Total for 1964</i>	<i>% Increase or (Decrease)</i>		
		<i>1962/61</i>	<i>1963/62</i>	<i>1964/63</i>		<i>1962/61</i>	<i>1963/62</i>	<i>1964/63</i>

<i>Federal Hospitals and Nursing Stations</i>								
All levels of care.....	24,101	26.6	1.4	1.4	630,191	15.2	(2.9)	(0.6)
Total, All levels of Care	1,070,975	2.2	3.9	3.1	13,482,310	4.4	3.3	3.8

¹For a description of the planning standards used by the Commission, see page 10 of the 1964 Annual Report of the Ontario Hospital Services Commission.

Part II

	<i>Percentage of Beds Occupied</i>			<i>Admissions per 1,000 Eligible Population</i>			<i>Average Length of Stay</i>		
	1962	1963	1964	1962	1963	1964	1962	1963	1964
<i>Public and Private Hospitals</i>									
1. Active treatment.....	83.9	84.1	83.3	149	152	153	10.2	10.2	10.2
2. Convalescent care.....	70.6	51.4	50.0	1	1	1	45.5	45.7	46.5
3. Chronic care.....	91.9	87.4	91.3	1	1	1	302.8	275.6	262.3
All levels of care.....	85.0	83.7	83.6	151	154	155	12.7	12.6	12.5
<i>Federal Hospitals and Nursing Stations</i>									
All levels of care.....	67.0	65.1	67.0	3	3	3	29.0	28.6	26.3
Total, All levels of Care	83.9	82.5	82.6	154	157	158	13.1	12.9	12.8

In Table B, Parts I and II, small increases will be noted for 1964 in almost every section. Because of the growth in population and the increase in the number of beds available in those regions where there was a shortage of beds, a rise in the number of admissions and days of care could be expected. The slight rise in the overall occupancy rate still reflects the fact that not all of the available convalescent beds were in operation by the end of 1964.

Although the days of care per 1,000 eligible population¹ shown in Table C increased only slightly in total, the greatest rise in the number of days occurred principally on behalf of active treatment patients.

TABLE C

	<i>Days of Care</i>				<i>Percentage Increase or (Decrease)</i>		
	<i>Per 1,000 Population</i>						
	1961	1962	1963	1964	1962/61	1963/62	1964/63
<i>Public and Private Hospitals</i>							
1. Active treatment.....	1,490	1,514	1,551	1,572	1.6	2.4	1.4
2. Convalescent care.....	22	31	34	38	40.9	9.7	11.8
3. Chronic care.....	343	350	346	355	2.0	(1.1)	2.6
All levels of care.....	1,855	1,895	1,931	1,965	2.2	1.9	1.8
<i>Federal Hospitals and Nursing Stations</i>							
All levels of care.....	92	104	99	96	13.0	(4.8)	(3.0)
Total, All levels of care.....	1,947	1,999	2,030	2,061	2.7	1.6	1.5

The total number of newborn under care continued to decline in 1964, although the volume of care this group of patients received was almost identical to that given in 1963. As a result, the newborn average length of stay rose .1 days to 6.9 in 1964.

Effective January 1, 1964, the definition of newborn ceased to be related to the rate charged for newborn care in hospitals. The new definition as it relates to this group of patients is as follows:

"Newborn—an infant newly born in the hospital or admitted with the mother who was admitted for maternity service, is a newborn for the period of his continuous stay in the hospital after birth or admission, to separation (i.e., discharge or death) from the hospital. (Transfer within the hospital from the newborn nursery is not to be considered a separation)"

The inclusion of sick babies in newborn statistics for the first time was another factor contributing to the increase in stay for this group.

¹For definition of eligible population see footnote 1 on page x.

TABLE D

	<i>Newborn under Care</i>			<i>Newborn Days of Care</i>			<i>Average Length of Stay of Newborn</i>		
	1963	1964	% Increase or (Decrease)	1963	1964	% Increase or (Decrease)	1963	1964	% Increase or (Decrease)
<i>Hospitals in Ontario</i>									
1. Public.....	155,433	153,417	(1.3)	1,040,033	1,040,907	0.1	6.8	6.9	1.5
2. Private.....	2,724	2,619	(3.9)	17,358	16,689	(3.9)	6.4	6.5	1.6
3. Federal Nursing Stations.....	468	454	(3.0)	3,223	3,410	5.8	6.9	7.8	13.0
Newborn Total....	158,625	156,490	(1.4)	1,060,614	1,061,006	0.0	6.8	6.9	1.5

The total days of care in public active treatment hospitals shown in Table E is distributed by the type of care the patients received. A consistent increase took place in all but the obstetrical service. The most significant growth occurred in the provision of psychiatric care, attributable in large part to the sizeable increase in the numbers of psychiatric beds which have been made available in public general hospitals since the end of 1962. A major increase was also noted in the convalescent and chronic units attached to public active treatment hospitals which are shown under the heading "all other" in Table E.

TABLE E

<i>Days by Type of Service in Public Active Treatment Hospitals</i>	1962	1963	1964	% Increase or (Decrease)	
				1963/62	1964/63
Medicine-Surgery.....	6,886,206	7,193,713	7,491,913	4.5	4.1

Diagnoses of Patients Separated from Hospital (See Tables 15-17)

The morbidity statistics in Tables 15, 16 and 17 are listed according to the Canadian List of 98 primary diagnoses. The diagnoses shown on all active treatment and convalescent admission-discharge forms processed by the Commission during 1964 are shown in Tables F and 15. The breakdown of morbidity data shown in Table 16 refers to patients in hospitals for the chronically-ill and are grouped by major category of illness. Table 17 shows the leading causes of death in all hospitals.

In Table F the active treatment and convalescent patients separated from hospital are shown in descending order by major diagnostic grouping.

Perusal of Table 15 indicates that the five most common conditions requiring hospitalization are (absolute number of patients are shown in brackets): maternal deliveries (157,139), hypertrophy of tonsils and adenoids (82,572), all fractures (45,636), arteriosclerotic and degenerative heart diseases (38,284) and pneumonia (30,249). Fracture of the femur had the longest average length of stay of 46.5 days. The shortest average length of stay was tonsils and adenoids with 1.9 days, followed closely by diseases of the teeth and supporting structures which stayed an average of 2.3 days.

Table 16 indicates that vascular lesions affecting the central nervous system was the prime reason for hospitalization of chronically-ill patients and averaged 371.1 days. Inflammatory and other diseases of the central nervous system, however, had the longest stay, or an average of 524.9 days. The average length of stay for all chronic patients decreased substantially again in 1964. Since the Plan began in 1959, the average stay of chronically-ill patients cared for in hospital has declined from 383.4 to 223.9 days.

Table 17, which lists the conditions causing death in hospital, shows arteriosclerotic and degenerative heart disease as the cause for 6,559 deaths, or 25.3 per cent of all deaths in active treatment and convalescent hospitals. Malignant neoplasms ranked second in 1964 with 6,295 cases or 24.7 per cent of the total. The principal causes of death among chronically-ill patients were malignant neoplasms and vascular lesions affecting the central nervous system respectively. These two diagnostic groups accounted for 47.9 per cent of all hospital deaths of chronically-ill patients.

TABLE F

<i>Diagnostic Groupings</i>	<i>Number of Separations¹</i>			<i>% Total Discharges and Deaths</i>		<i>Average Length of Stay</i>	
	<i>1963</i>	<i>1964</i>	<i>% Increase</i>	<i>1963</i>	<i>1964</i>	<i>1963</i>	<i>1964</i>

Special Services Provided by Hospitals

Laboratory (See Table 4)

The 1960 edition of the Schedule of Unit Values for Clinical Laboratory Procedures published by the Dominion Bureau of Statistics is used by hospital laboratories to determine the unit evaluation for each laboratory procedure. The unit represents 10 minutes of time, 7 minutes of which are allotted to technical functions and the remaining 3 minutes to stenographic services, glass washing and other non-technical services performed in the laboratory. Included in the number of units of value are some procedures that are performed mostly outside the laboratory, such as basal metabolic rates, electrocardiographs and electroencephalographs. Excluded from the count of units are all interpretive, clinical, diagnostic, consultative, teaching and research functions.

Table G indicates that the continuing growth in laboratory services performed in public hospitals, while substantial, was not as great between 1963 and 1964 as it was in the preceding year. During 1964, the total work performed in hospital laboratories increased by 15.8 per cent as compared with 17.0 per cent in 1963. Most of this increase was on behalf of in-patients, who accounted for an additional 5,108,848 units of work. Table G has been amended this year to show the volume of work performed in public convalescent and chronic hospitals and those units associated with them.

¹Includes all adults and children separated from active treatment and convalescent hospitals in 1964 whose admission-discharge forms were processed between January 1-December 31, 1964.

²Due to rounding of decimal places this percentage shows a minor variance with the same category in Table 15.

TABLE G

	<i>Volume of Laboratory Services</i>			<i>% Increase Or (Decrease)</i>	
	1962	1963	1964	1963/62	1964/63

Radiology (See Tables 5 and 6)

The volume of diagnostic radiology performed in 1964 in public general hospitals showed a substantial increase when compared with 1963, both in terms of examinations and films taken. The growth in this service since 1962 is shown in Table H.

TABLE H

				<i>% Increase or (Decrease)</i>

Thirty-two hospitals in Ontario provided therapeutic radiology in 1964. The Ontario Cancer Treatment and Research Foundation operated The Princess Margaret Hospital in Toronto and seven clinics attached to public general hospitals. Although the number of patients and volume of treatments increased in 1964, the increase in the number of treatments was at a lower rate, causing the average number of treatments per patient to decrease from 10.2 in 1963 to 9.1.

Staffing of Hospitals (See Tables 7, 12, 13 and 14)

Table J illustrates the increases and decreases that have occurred in full and part-time staffing in various classes of hospitals and relates this data to the corresponding changes that occurred in the availability of rated beds. When all hospitals are considered, the growth in beds and staff approximate each other very closely.

¹Calculated on four decimal places.

TABLE J

	<i>Rated Beds % Increase or (Decrease) 1964/63</i>	<i>Employees on Staff as at December 31st</i>

Paid Hours of Work (See Tables 8 and 9)

Table 8 shows the percentage distribution of paid hours of work among the various hospital departments. This table gives the provincial averages for hospitals falling within selected bed size ranges.

Table 9 is new this year and shows departmental paid hours of work on a per diem basis. It has been designed so it can be related to the corresponding data in Tables 20 and 21, on gross operating costs and salaries and wages.

Formal Training Programmes in Public Hospitals (See Table 10)

Table K presents in capsule form the detailed data found in Table 10. The latter table provides information on the major paramedical courses given in those hospitals approved under the Plan.

The percentage increase in enrollment was highest for laboratory technologists (20.3%) and medical record librarians (58.8%) while the number of student nurses increased by only 0.9% and nursing assistants decreased by 1.2 per cent. The number of nursing students who graduated in 1964 was 2,307; an increase of 185 or 8.7 per cent over 1963. A substantial decrease occurred in the number of laboratory technologists who graduated in 1964 as shown by a decrease of 22.8 per cent over 1963.

TABLE K

	<i>Number of Hospitals</i>	<i>Enrolment at December 31st</i>			<i>Number that Graduated</i>		
<i>School or Course</i>		<i>1963</i>	<i>1964</i>	<i>% Increase or (Decrease)</i>	<i>1963</i>	<i>1964</i>	<i>% Increase or (Decrease)</i>
<i>Public General Hospitals</i>							
Nurses.....	57	7,611	7,678	.9	2,122	2,307	8.7
Radiological Technicians.....	64	412	429	4.1	164	176	7.3
Laboratory Technicians.....	51	414	498	20.3	189	146	(22.8)

<i>Public Hospitals for the Chronically-ill</i>							
Nursing Assistants.....	2	39	41	5.1	85	90	5.9

In addition to the courses and schools mentioned above, The Nightingale School of Nursing graduated 46 nurses in 1964. The enrolment of this school was 119 at December 31, 1964.

The Quo Vadis School of Nursing for women between the ages of 30 and 50, started its first class in September 1964 with an enrolment of 32. Further particulars about this school can be found in the 1964 Annual Report of the Ontario Hospital Services Commission.

B. FINANCIAL DATA (Tables 18-23)

The hospital operating expenses shown in the financial tables (18 to 23) was derived from the Annual Returns (HS-2) of public hospitals and their year-end settlement forms (HF series).

During 1964 the total financial responsibility of the Commission amounted to \$305,739,960. The distribution for 1964 as compared with 1963 and 1962 follows:

	1962	1963	1964	% Increase or (Decrease)	
				1963/62	1964/63
Public Hospitals in Ontario.....	\$224,313,770	\$252,167,477	\$281,769,099	12.42	11.74
Hospitals outside Ontario.....	2,812,577	3,210,340	3,712,512	14.14	15.64
Federal Government Hospitals.....	6,215,383	6,829,531	7,332,098	9.88	7.36
Privately owned hospitals, including nursing homes.....	8,083,855	8,461,046	8,909,765	4.67	5.30
Out-patient services for emergency care.....	4,336,411	5,006,628	6,359,548	15.46	27.02
Recoveries from other insurers.....	(1,318,946)	(1,795,570)	(2,343,062)	36.14	30.49
Total.....	\$244,443,050	\$273,879,452	\$305,739,960	12.04	11.63

Readers of this Supplement are cautioned that valid comparisons can only be made with a thorough knowledge of the various number and types of administrative and other practices occurring within individual hospitals which are reflected in the data presented herein. Operating costs vary widely from hospital to hospital and are dependent upon a number of factors such as composition and layout of plant facilities, number and qualifications of staff, types of treatment given, percentage of beds occupied, the operation of a School of Nursing or other training programmes and the volume of out-patient services offered.

(4) Lakeshore Private Hospital, New Toronto; license was not renewed for 1964.

(5) The licensed beds in the Villa Private Hospital, Thornhill were reduced from 38 to 24 for 1964.

(6) (a) The number of beds available in Sunnybrook Hospital, Toronto was temporarily reduced by the 43 leased to Wellesley Hospital, Toronto and (b) Westminster Hospital, London reduced its rated bed capacity by 58.

(7) The patients and days in the Rideau Health and Occupational Centre, Convalescent Unit, Ottawa, are combined with the figures for Chronic Care and shown only in the Chronic column as they were not reported separately by the hospital.

(8) Two nursing homes were approved and one ceased to operate under the Plan in 1964.

[illegible]

TS—Denotes Training Schools for Nurses.

1. Includes isolation beds and beds used by patients requiring long-term care in hospitals that do not have officially recognized convalescent or chronic units. Also included are beds in specific areas set aside for medical and surgical specialties such as orthopaedics, cardiology, neuro-surgery, urology, gynaecology, ophthalmology and intensive care, as well as detention beds in hospitals which do not have officially recognized psychiatric units.
2. In many smaller hospitals, principally those under 75 beds, "paediatric" beds are drawn from the medical-surgical service as required; consequently, the patient-day figures shown on Table 3 are more indicative of the utilization in this area, than the bed figures reported by the hospitals. For the Red Cross Outpost, or Group D hospitals, the same comment also applies to obstetrical beds.
3. For individual hospitals, percentage occupancies based on rated beds were calculated on the number of rated beds available throughout the year, and not on the final bed capacity shown. Thus any hospital reporting a change in their rated bed capacity had its occupancy calculated on the number of rated beds before and after the increase(s) or decrease(s). See footnote 19 for those hospitals which had significant changes in the number of rated beds. In calculating percentage occupancies for all groups of hospitals, the total rated beds as at December 31, 1964 were used.
4. All percentages in these columns were based on the number of beds as of December 31, 1964.
5. The Hamilton Civic Hospitals is a single corporation composed of two hospitals which have been listed separately. To obtain a complete picture of the total operation, the two need to be combined.
6. Toronto, The Wellesley Hospital—rated capacity includes: 43 beds at Sunnybrook Hospital, which are being used for arthritic and rheumatic patients. The Wellesley Hospital lost 23 beds in October 1964 due to expansion programme now in progress.
7. Toronto, The Hospital for Sick Children—the 802 paediatric beds are distributed into 689 medical-surgical, 107 isolation, and 6 intensive care.
8. Sault Ste. Marie, The General—new unit for chronically-ill opened August 15, 1964.
9. Orillia, Orillia Soldiers' Memorial—new unit for chronically-ill opened December 15, 1964.
10. Orangeville, Dufferin Area—new unit for chronically-ill opened December 15, 1964.
11. Ajax, Ajax and Pickering General Hospital—replacement hospital opened December 1, 1964.
12. Toronto, Orthopaedic and Arthritic—replacement hospital opened August 21, 1964; use of 45 beds in Hastings Building at Riverdale Hospital discontinued
13. Alliston, Stevenson Memorial—replacement hospital opened July 1, 1964.
14. Port Hope, The Port Hope and District—replacement hospital opened November 6, 1964.
15. Hagersville, West Haldimand General—new hospital opened March 1, 1964 to take the place of Beckliffe Private Hospital which closed in May, 1963.
16. Ottawa, St. Vincent—50 beds for the chronically-ill were re-classified to provide a convalescent unit of same size, effective December 7, 1964.
17. Toronto, Queen Elizabeth—46 beds for the chronically-ill were re-classified to provide a new 50-bed convalescent unit, effective October 7, 1964.
18. Kitchener, Freeport Sanatorium (Coult's Wing)—chronic unit was reduced by 16 beds to provide a 15-bed convalescent unit, effective October 7, 1964.
19. Those hospitals that had significant increases or decreases in the number of rated beds during the calendar year ending December 31, 1964 are listed below:

TS—Denotes Training School for Nurses.

- Newborn admissions do not necessarily equal the live-births in hospital, since admissions include any newborn born on the way to hospital. The definition of a newborn appears on page xii of this Statistical Supplement.
- The Hamilton Civic Hospitals is a single corporation composed of two hospitals which have been listed separately. To obtain a complete picture of the total operation, the two need to be combined.
- Toronto, The Wellesley Hospital—patients include those treated at the 43 bed arthritic and rheumatic unit temporarily located at Sunnybrook Hospital, while the Wellesley Hospital is undergoing expansion.
- Sault Ste. Marie, The General—new unit for chronically-ill ready for occupancy August 15, 1964. Half of these beds were utilized for active treatment, effective October 13, the remainder were not opened due to shortage of staff.
- Orillia, Orillia Soldiers' Memorial—new unit for chronically-ill ready for occupancy December 15, 1964.
- Pembroke, Pembroke Cottage—chronic unit not in use in 1964.
- Collingwood, Collingwood General and Marine—beds in chronic unit, which was officially opened on December 20, 1963, were utilized for active treatment patients in 1964.
- Orangeville, Dufferin Area—new unit for chronically-ill ready for occupancy December 15, 1964. Patients not admitted till 1965.
- Port Hope, Port Hope and District—replacement hospital including new chronic unit opened November 6, 1964. Patients not admitted to chronic unit until 1965.
- Hagersville, West Haldimand General—new hospital opened March 1, 1964.
- Ottawa, St. Vincent—new 50 bed convalescent unit created by re-classification of existing beds opened December 7, 1964.
- Toronto, Queen Elizabeth—new 50 bed convalescent unit created by re-classification of existing beds opened October 7, 1964.
- Windsor, Riverview—hospital reduced its rated bed capacity from 353 to 262 during 1964.
- Weston, Toronto Hospital—chronic unit was expanded from 60 to 150 beds in 1964.
- Kitchener, Freeport Sanatorium (Courts Wing)—new 15 bed convalescent unit created by re-classification of existing beds opened October 7, 1964. Re-classification of patients did not become effective until January 1, 1965 due to administrative practices.
- This hospital had an increase or decrease in its rated bed capacity of 10 or more beds during the calendar year ending December 31, 1964. Details regarding the nature of the change appear in footnote 19 to Table 1.

TS—Denotes Training School for Nurses.

1. For the smaller hospitals, principally those under 75 beds, the patient day figures shown for the "paediatric service" are more indicative of the utilization in this area, than the bed figures reported by the hospital, which are shown in Table 1, since these hospitals usually draw their "paediatric" beds from the medical-surgical service as required. The same comment also applies to the obstetrical days shown for Red Cross Outpost (or Group D) hospitals.
2. See definition of newborn on page xii of this Supplement.
3. The Hamilton Civic Hospitals is a single corporation composed of two hospitals which have been listed separately. To obtain a complete picture of the total operation, the two need to be combined.
4. Toronto, The Wellesley Hospital—includes patient days of those patients being treated temporarily at Sunnybrook Hospital.
5. Sault Ste. Marie, The General—new unit for chronically-ill ready for occupancy August 15, 1964. Half of these beds were utilized for active treatment, effective October 13, the remainder were not opened due to shortage of staff.
6. Orillia, Orillia Soldiers' Memorial—new unit for chronically-ill ready for occupancy December 15, 1964.
7. Pembroke, Pembroke Cottage Hospital—chronic unit not in use in 1964.
8. Collingwood, Collingwood General and Marine—beds in chronic unit, which was opened on December 20, 1963, were utilized for active treatment patients in 1964.
9. Orangeville, Dufferin Area—new unit for chronically-ill ready for occupancy December 15, 1964. Patients not admitted till 1965.
10. Port Hope, Port Hope and District—replacement hospital including new chronic unit opened November 6, 1964. Patients not admitted to chronic unit until 1965.
11. Hagersville, West Haldimand General—new hospital, opened March 1, 1964.
12. Ottawa, St. Vincent—new convalescent unit created by re-classification of existing beds opened December 7, 1964.
13. Toronto, Queen Elizabeth—new convalescent unit, created by re-classification of existing beds opened October 7, 1964.
14. Windsor, Riverview—hospital reduced its rated bed capacity from 353 to 262 during 1964.
15. Weston, Toronto Hospital—chronic unit was expanded from 60 to 150 beds in 1964.
16. Kitchener, Freeport Sanatorium (Coutts Wing)—new convalescent unit, created by re-classification of existing beds opened October 7, 1964. Re-classification of patients did not become effective till January 1, 1965 due to administrative practices.
17. This hospital had either a significant increase or decrease in its rated bed capacity during the calendar year ending December 31, 1964. Details regarding the nature of the change appear in footnote 19 to Table 1.

TS—Denotes Training School for Nurses.

1. As the amount of laboratory service performed on behalf of patients in convalescent and or chronic units attached to public general hospitals is believed to be negligible, a lesser distortion seemed assured in these calculations by using only active treatment patients and days in the divisors.

2. Hours include total paid hours for all laboratory staff (including student technicians but excluding pathologists) and not for technicians alone.

3. Hospital has a chronic unit—see footnote 1 above. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

4. Hospital has a convalescent unit—see footnote 1 above. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

5. The Hamilton Civic Hospitals is a single corporation composed of two hospitals which have been listed separately. To obtain a complete picture of the total operation, the two need to be combined.

6. Toronto, The Wellesley Hospital includes laboratory services rendered to patients being treated in the arthritic unit at Sunnybrook Hospital.

7. Hagersville, West Haldimand General—new hospital, opened March 1, 1964.

8. This hospital had either a significant increase or decrease in its rated bed capacity during the calendar year ending December 31, 1964. Details regarding the nature of the change appear in footnote 19 to Table 1.

9. Those hospitals that did not report either laboratory units or hours of work in the laboratory department were not included in the related total figures for hospital groups (i.e., bed-size and alphabetic classifications) or the grand total.

10. Hospital operates an approved course for training laboratory technicians. See Table 10 for particulars about numbers enrolled and totals graduated.

1. Paid hours of work per diem are based on total hours of persons employed in active, convalescent and chronic units and corresponding total adult and child days plus 1/4 newborn days.

2. Nursing services are reported in total because of lack of detailed uniform information about individual nursing units.

3. Per diems for hospitals with convalescent and/or chronic units are somewhat understated due to inclusion of convalescent and chronic days in divisor, although amount of laboratory and radiology service given to these classes of patients is relatively negligible.

4. Other special and supplementary services include pharmacy, physiotherapy, occupational therapy, medical records, social service, etc.

5. Paid hours of work relating to non-allowable operating costs include special research projects, ambulance service, ancillary operations, etc.

6. Hospital has a chronic unit—see footnote 3 above. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

7. Hospital has a convalescent unit—see footnote 3 above. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

8. The Hamilton Civic Hospitals is a single corporation composed of two hospitals which have been listed separately. To obtain a complete picture of the total operation, the two need to be combined.

9. Paid hours for The Nighthingale School of Nursing are excluded.

10. Toronto, the Wellesley Hospital—would include paid hours of staff of arthritic unit temporarily located at Sunnybrook Hospital.

11. Hagersville, West Haldimand General, new hospital opened March 1, 1964.

12. This hospital had either a significant increase or decrease in its rated bed capacity during the calendar year ending December 31, 1964. Details regarding the nature of the change appear in footnote 19 to Table 1.

13. This hospital established a convalescent unit in 1964. Details regarding size of unit, its patient load and days of care will be found in Tables 1 to 3.

1. Unless otherwise noted, rated bed capacity refers to active, convalescent, and/or chronic beds. Not shown are beds in Department of Veterans Affairs hospitals assigned to accommodate committed mental patients and domiciliary patients.

2. Percentage occupancies are based on rated active and chronic beds with the exception of Ottawa Rideau Health and Occupational Centre where domiciliary beds have been included, and Moose Factory Indian Hospital where tuberculosis beds have been included, as statistics relating to these types of care could not be removed.

3. Total days stay since admission for discharges and deaths.

4. Moose Factory Indian Hospital—beds for tuberculosis patients not shown in rated bed capacity, statistics however include figures relating to tuberculosis care.

5. Ottawa Rideau Health and Occupational Centre—statistics include figures relating to domiciliary care.

6. Personnel figures include those persons employed in the long-term mental, domiciliary and tuberculosis units.

7. Toronto, Sunnybrook Hospital—rated capacity declined by 43 beds in 1964, due to loan of this accommodation to The Wellesley Hospital until the latter's construction programme is completed.

II. NEOPLASMS								
6. Malignant neoplasm of buccal cavity and pharynx.....	140-239	58,882	8.9	1,017,565	154.5	17.3	5.7	9.2
7. Malignant neoplasm of stomach.....	140-148	898	0.1	19,866	3.0	22.1	0.1	0.2
8. Malignant neoplasm of large intestine, except rectum.....	151	1,435	0.2	38,447	5.8	26.8	0.1	0.3
9. Malignant neoplasm of rectum.....	153	2,731	0.4	82,886	12.6	30.4	0.3	0.7
10. Malignant neoplasm of bronchus, trachea and lung, primary and unspecified.....	154	1,410	0.2	46,278	7.0	32.8	0.1	0.4
11. Malignant neoplasm of breast.....	162-163	2,813	0.4	67,075	10.2	23.8	0.3	0.6
12. Malignant neoplasm of cervix uteri.....	170	3,851	0.6	86,976	13.2	22.6	0.4	0.8
13. Malignant neoplasm of uterus other than of cervix uteri.....	171	2,448	0.4	40,242	6.1	16.4	0.2	0.4
14. Malignant neoplasm of ovary, Fallopian tube and broad ligament.....	172-174	1,096	0.2	17,907	2.7	16.3	0.1	0.2
15. Malignant neoplasm of prostate.....	175	800	0.1	19,251	2.9	24.1	0.1	0.2
16. Malignant neoplasm of kidney, bladder and other urinary organs.....	177	2,054	0.3	51,493	7.8	25.1	0.2	0.5
	180-181	2,595	0.4	52,609	8.0	20.3	0.3	0.5
	204	1,442	0.2	26,618	4.0	18.5	0.1	0.2
17. Leukaemia and leukaemia.....	150, 152, 155-161, 164, 165	9,295	1.4	230,983	35.1	24.9	0.9	2.1
18. Other malignant neoplasms and neoplasms of lymphatic and haematopoietic tissues.....	176, 178, 179, 190-203, 205	8,531	1.3	88,544	13.5	10.4	0.8	0.8
19. Benign neoplasm of uterus.....	214-215	3,307	0.5	34,762	5.3	10.5	0.3	0.3
20. Benign neoplasm of ovary.....	216							
21. Benign neoplasm (excluding uterus and ovary) and neoplasm of unspecified nature.....	210-213, 217-239	14,176	2.2	113,628	17.3	8.0	1.4	1.0
III. ALLERGIC, ENDOCRINE SYSTEM, METABOLIC AND NUTRITIONAL DISEASES								
22. Asthma.....	240-289	25,576	3.9	382,539	58.1	15.0	2.5	3.4
23. Other allergic disorders (excluding asthma).....	241	6,641	1.0	70,947	10.8	10.7	0.7	0.6
24. Diseases of thyroid gland.....	240, 242-245	1,421	0.2	10,765	1.6	7.6	0.1	0.1
25. Diabetes mellitus.....	250-254	3,170	0.5	40,089	6.1	12.6	0.3	0.4
26. Diseases of other endocrine glands.....	260	11,141	1.7	209,566	31.8	18.8	1.1	1.9
27. Avitaminoses and other metabolic diseases.....	270-277	936	0.1	14,096	2.2	15.1	0.1	0.1
	280-289	2,267	0.4	37,076	5.6	16.4	0.2	0.3
IV. DISEASES OF THE BLOOD AND BLOOD-FORMING ORGANS								
28. Diseases of the blood and blood forming organs.....	290-299	5,545	0.8	78,647	11.9	14.2	0.5	0.7
	300-309	26,635	4.1	477,446	72.5	17.9	2.6	4.3
V. MENTAL, PSYCHONEUROTIC AND PERSONALITY DISORDERS								
29. Psychoses.....	300-326	15,479	2.4	274,499	41.7	17.7	1.5	1.2
30. Psychoneurotic disorders.....	310-318	5,505	0.8	67,242	10.2	12.2	0.5	0.6
31. Disorders of character, behaviour and intelligence.....	320-326							
VI. DISEASES OF THE NERVOUS SYSTEM AND SENSE ORGANS								
32. Vascular lesions affecting central nervous system.....	330-398	48,226	7.3	702,493	106.7	14.6	4.7	6.4
33. Inflammatory and other diseases of central nervous system.....	330-334	11,861	1.8	305,852	46.1	25.8	1.1	2.8
34. Diseases of nerves and peripheral ganglia.....	340-345, 350-357	8,024	1.2	158,753	24.1	19.8	0.8	1.4
35. Diseases and conditions of the eye.....	360-369	2,936	0.4	40,700	6.2	13.9	0.3	0.4
36. Diseases of ear and mastoid process.....	370-389	15,454	2.4	127,537	19.4	8.3	1.5	1.2

SOURCE: Admission-Discharge Forms processed between January 1, and December 31, 1964.

1. These statistics include: (a) Ontario residents hospitalized in public and private hospitals as well as those patients in Federal hospitals for whom O.H.S.C. was responsible;

(b) Insured Ontario residents hospitalized in out-of-province hospitals;

(c) Out-of-province residents hospitalized in Ontario hospitals.

2. A Canadian List of 98 diagnoses selected as a basis for study by provincial hospital insurance programmes.

3. International Statistical Classification of Diseases, Injuries and Causes of Death, 1955 Revision.

4. Includes all patients who were discharged from or died in hospital.

5. Includes days of care accrued to all patients who were discharged from or died in hospital.

6. Newborn definition was changed in 1964 and consequently all newborn are now excluded from these statistics.

* Indicates less than 0.1.

SOURCE: Admission-Discharge Forms processed between January 1 and December 31, 1964.

1. These statistics include: (a) Ontario residents hospitalized in public and private hospitals, O.H.S.C. temporarily approved nursing homes as well as those patients in Federal hospitals for whom O.H.S.C. was responsible;

(b) Insured Ontario residents hospitalized in out-of-province hospitals;

(c) Out-of-province residents hospitalized in Ontario hospitals.

2. International Statistical Classification of Diseases, Injuries and Causes of Death, 1955 Revision.

3. Includes all patients who were discharged from or died in hospital.

4. Includes days of care accrued to all patients who were discharged from or died in hospital.

5. Due to rounding of decimal places, the figures for the individual categories in this Chapter do not balance to the Chapter total.

* Indicates less than 0.1.

E R R A T A

Ontario Hospital Services Commission

1964 Statistical Supplement to Annual Report

Please correct the following on TABLE 18, PAGES 91 TO 97 INCLUSIVE
Column entitled: "Approved Net Allowable Costs Per Active Patient Under Care".

Each figure shown in this column should be multiplied by 100.

EXAMPLE: Page 91, first figure should read \$531.00.

Please staple this notice to Page 90 of the Statistical Supplement.

October 20, 1965.

* In addition there is an approved convalescent rate equivalent to the chronic rate.

1. Includes operating costs for Chronic Unit.

2. Includes operating costs for Convalescent Unit.

A. Toronto, St. Joseph's - The Quo Vadis School of Nursing is included.

B. Toronto, Peterborough - The Peterborough Journal of Nursing is included.

C. Toronto, The Princess Margaret - The major proportion of expenditures relate to research and care of out-patients.
